

You will need:

2 pieces of fabric cut into 10" squares.

1 piece of 11" square batting

4 coordinating buttons

A walking foot for your sewing machine if you have one.

Step 1: Layer the fabric, right sides together, on top of the batting

Step 2: Stitch 1/4" seam around perimeter, leaving an opening of about 4" on one side.

Step 3: Trim 1/4" from the seam allowances to reduce bulk.

Step 4: Turn right side out and press. Gently push the corners out.

Step 5: Fold in the seam allowance at the opening. Top stitch close to the edge, closing the opening as you go.

Step 6: Sew around the square, placing the side of the foot on the stitched line.

Step 7: Fold the quilted square in half, right sides together. Mark a 2" triangle in the corners on the inside fabric.

Step 8: Stitch the 2 bottom corners, backstitching at the beginning and end.

Step 9: Open it up and fold it in the other direction, marking and stitching the remaining 2 corners. Be sure to backstitch.

Step 10: Turn the box right side out.

Step 11: Fold the points down and secure with a button then tack the inside flaps down.
